

Horizon Robotics

Horizon Robotics is an artificial intelligence computing platform integrating algorithm, processor design, software, and hardware capabilities. The company envisions every device to become an intelligent entity, providing solutions for processor design, high-performance cloud computing, parallel computing, face recognition, and voice semantic recognition. The company brings large-scale cloud-based deep neural network algorithms onto high-performance and low-power Brain Processing Units (BPUs).

Overview:

Geographic Region: China

Industry: Artificial intelligence

Company Website: <https://www.horizon.ai/>

CEO: Kai Yu

Investors:

SK Hynix

SK China

Intel Capital

Morningside Venture Capital

Funding Rounds

Date	Transaction Type	Lead Investors	Capital Raised	Valuation
9/26/2022	Later Stage VC (Series D)	Chery Automobile	-	\$1.90B
02/27/2019	Series B	SK Hynix, SK China	\$600M	\$3B (current)
10/20/2017	Series A	Intel Capital	\$100M	
02/17/2016	Seed Round	ZhenFund	\$300K
